

## Business Beyond the Ordinary

Océ helps the people who make our world. Companies everywhere use Océ high-speed printing, technical documentation, and professional document systems to keep the wheels of business, industry and government turning. Océ also helps the world. Developing products and services that add value to the document processes of our customers, while minimizing environmental impact and protecting health and safety, has always been one of our core principles. From bank statements to utility bills, from blueprints to newspapers, from on-demand documents to wide-format display graphics, Océ helps our professional customers go “Beyond the Ordinary” in print and document management.

Series overview

## Océ Arizona Series UV flatbed printers

Océ Arizona Series is the best-selling UV flatbed printer family in the world.

Every model uses UV curable inks and Océ VariaDot™ imaging technology to deliver near-photographic image quality. Each is built on a true flatbed architecture to print

on almost any rigid media or object, and each offers a Roll Media option

for printing onto flexible materials. A White Ink option is available on

select models. The Océ Arizona Series is also most honored with numerous

industry awards to date including four SGIA Product of the Year awards.

## Innovate your business

With an Océ Arizona Series printer, you can print on irregularly shaped objects or non-square media, heavy substrates such as glass, or materials that have an uneven surface such as wood. Add value to a metal cookie box, a DVD, a piece of furniture, a pane of architectural glass, a sheet of painted aluminum, wood, MDF, or even a full-sized garage door. Using the White Ink option to its full effect can have a very positive impact on the margins that you can demand of your customers. The Océ Arizona Series offers unparalleled versatility if you're serious about innovation and higher margin printing applications.
